**INFORMED CONSENT FOR USE OF AUDIO/VIDEO EQUIPMENT**

In an effort to provide the most professional and competent treatment to you, your therapists routinely consults with his or her supervisor. An audio or video tape is often utilized to allow the therapist to later review the interaction between client and therapist and to better plan for the next session. The audio/video tapes are considered confidential and will only be used for supervisory purposes. At the end of the supervision session, the tape will be destroyed.

I have read the above statement of procedure at Metropolitan Counseling Services and, understanding its purpose and potential benefits or harm to me, and agree to its use. I understand that this consent may be withdrawn at any time. I understand that withdrawal of my consent will in no way adversely affect my therapy or my relationship with my therapist.

This consent will remain in effect until such time that I complete therapy at Metropolitan Counseling Services, change to another therapist at MCS, or until I withdraw my consent.
